

ULTREFINER ELITE PREMIUM DRINKING WATER SYSTEM

Elevate your drinking water experience.

The Ultrefiner Elite Drinking Water System offers outstanding undersink filtration, delivering fresh and delicious water that's ready to drink and enhances the flavors of your favorite beverages and meals.

Better Tasting Water

Enjoy cleaner, better-tasting water that's perfect for cooking and preparing your favorite drinks

Aesthetic Features

Choose a dedicated, lead-free water faucet in chrome, brushed nickel, or matte black to match your kitchen decor

Streamlined Design

Three stages of filtration and simple cartridge replacement make the system easy to use and maintain

Cost Savings

Reduce the need for bottled water and decrease your single-use plastic waste

Contaminant Reduction

Tested and certified to NSF/ANSI standards 42, 53, 58 & 401 for Total PFAS*, Lead, Microplastics, Chlorine, Chloramine, and other contaminants such as Ibuprofen

Limited Warranty

Get peace-of-mind with one of the most comprehensive warranties in the industry

*The test mixture for total PFAS is made up of PFOA (500 ppt), PFOS (1,000 ppt), PFHxS (300 ppt), PFNA (50 ppt), PFHpA (40 ppt), PFBS (260 ppt), and PFDA (10 ppt). This system meets the 20 ppt requirement for Total PFAS

Ultrefiner Elite Features

Multistage Filtration Process

Reverse osmosis and carbon filtration work together to reduce a to reduce chlorine levels, Total PFAS, Microplastics, and other contaminants that can pose a threat to human health.

Cost-Saving Maintenance

Designed with three filters rather than the industry standard of five, which means less money is spent on routine maintenance.

Green Filter Design

Dispose of only the filter rather than the entire canister during filter changes, reducing waste.

How the Ultrefiner Elite Drinking Water System Works

Unfiltered water enters the system from the inlet valve.

Water flows through the pre-filter which reduces particles and chlorine taste and odor.

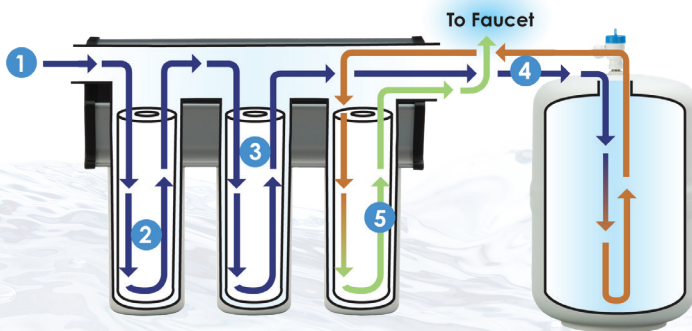

Water then enters the Ultrefiner Elite reverse osmosis stage where it is filtered through a spiral wound, semi-permeable membrane.

The resulting highly filtered water enters a storage tank.

Your reverse osmosis water is finally filtered through the post-filter and delivered using a dedicated drinking water faucet to enjoy cleaner, better-tasting water.

RainSoft

Ultrefiner Elite is tested and certified by NSF International against NSF/ANSI Standard 42, 53, 58, 401, and CSA 483.1. Ultrefiner Elite is certified by IAPMO R&T to NSF/ANSI Standard 53 for the reduction of Total PFAS. See performance data sheets for specific reductions claims, individual containments and reduction performance.

Benefits will be provided by various types of RainSoft equipment when installed and operated according to manufacturer's recommendations. Operational, maintenance and replacement requirements are essential for the product to perform as advertised. All claims based on best available information at time of printing. Manufacturer makes no representations as to the suitability of this equipment for a particular application. Buyer relies entirely on dealer's recommendations in the purchase of this equipment. Independent RainSoft dealers may include, together with your RainSoft product, a product or component that is not manufactured by RainSoft or their parent company, Aquion, Inc. Any non-RainSoft product may be covered by the manufacturer of that product, and is not covered by the RainSoft warranty. Aquion, Inc does not warrant that your RainSoft product and the non-RainSoft product will perform properly when used together, and assumes no liability therefore.
